

A scenic landscape at sunset. The sun is low on the horizon, casting a warm orange glow across the sky and reflecting in the water. In the foreground, there is a shallow pond with tall green reeds. The middle ground shows a larger body of water, possibly a lake, with a forest of trees in the background. The overall atmosphere is peaceful and natural.

Birds Art 12 reporting testing 2024 Reportnet 3 walkthrough

Jonathan Maidens and Eleni Tryfon / 28th May 2024

AGENDA

- Aim of the Webinar
- Current status of Art. 12 developments
- Testing
- Next steps
- Reportnet 3.0 functionalities
- Q&A

What is the Webinar about

Introduction to basic functionalities of Reportnet 3.0 for Art 12 dataflow - most functionalities are also valid for Art. 17

Presentation - questions and answers

Meeting duration 2 hours

The meeting will be recorded

Recording will appear in the Art 12 reference portal

https://cdr.eionet.europa.eu/help/birds_art12

The screenshot displays the EIONET Central Data Repository website. At the top, the European Environment Agency logo is visible on the left, and a 'Login' button is on the right. The main header features the 'EIONET Central Data Repository' logo and a decorative graphic of blue circles. Below the header, a breadcrumb trail reads 'You are here: Eionet » CDR » General Help » Birds Directive Art 12'. The page is divided into two main sections. On the left, there is a 'Navigation' menu with links for 'Search by obligation', 'Search XML files', 'Search for feedback', 'Global worklist', 'Notifications', and 'Help'. Below this is an 'Account Services' section with a link for 'lost my password'. The main content area on the right is titled 'Reference portal for reporting under Article 12 of the Birds Directive'. It contains a 'Helpdesk' section with the email address nature.helpdesk@eionet.europa.eu. Below the helpdesk, there is a notice about data protection rules under Regulation (EU) 2018/1725. Two prominent grey boxes highlight key information: 'Deadline for deliveries for the reporting period 2019-2024 is the 31st of July 2025' and 'Format, Explanatory Notes and Guidelines for the period 2019-2024'. At the bottom, there is a section for 'Reporting format Article 12' with two links: 'Reporting Format Art. 12' (with a PDF icon) and 'Reporting Format Art. 12' (with a document icon).

Stage of Art. 12 dataflow developments

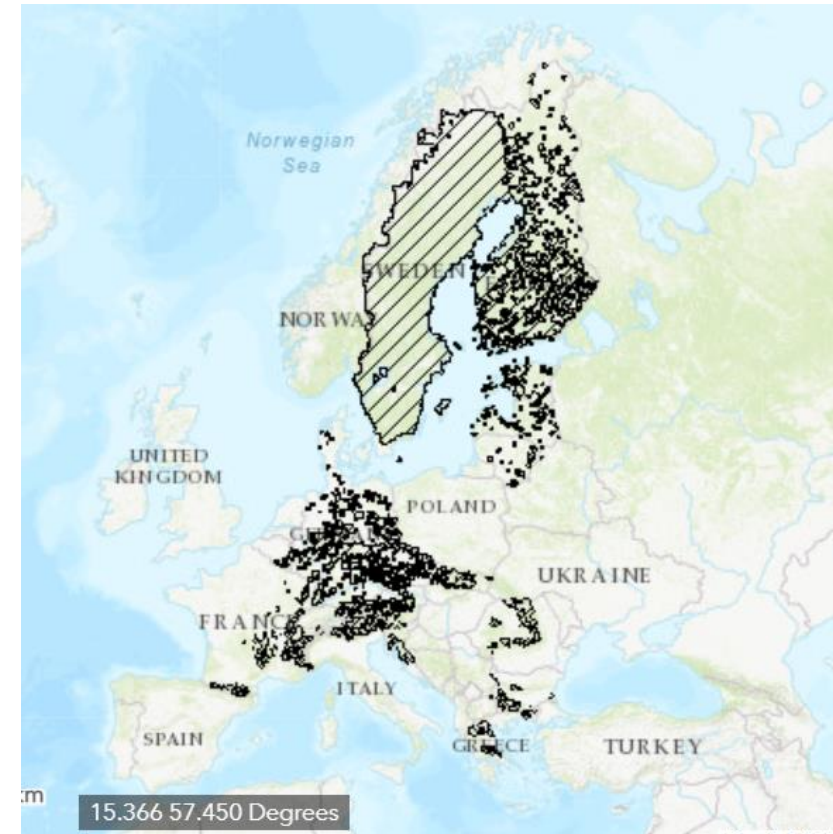

Art. 12 dataflow, reference tables and validation rules (v.1 shared in the Reference Portal) further developed and tested from EEA and ETC BE

Following the views of the MS, the part of reporting of spatial information is finalised

MS will be invited to provide

- a file with the grid cell codes
or alternatively
- a shapefile or a geopackage

We will, however, discard the geometry files, if provided, and convert them to a table with grid cell codes

Testing of Art. 12 dataflow from MS

Testing of Art 12 from MS will be opened soon after the Webinar **until 14 August 2024**

Information will be sent via e-mail to EGR participants + the 'lead testers' designated

If not done so already, indicate the name and email address of one 'lead tester' per country, by sending an email to nature.helpdesk@eionet.europa.eu.

Main objective of testing is

- get familiar with the platform
- submit feedback if errors identified

An invitation to join a Teams channel including a document for comments will be sent to 'lead testers'

The lead tester should provide all comments of the country **until 14 August 2024**

Any questions on the functioning of the platform should be addressed to nature.helpdesk@eionet.europa.eu

A draft **Reporting Manual** will be made available at the Reference Portal and the Reportnet 3.0 platform. MS can submit comments on this draft through the Teams channel.

Next steps

After testing is finalised, EEA / ETC BE will look into the comments and prepare an updated version of the Art 12 dataflow and Reporting Manual

A similar process will be in place for Art 17 after summer (Webinar / testing roughly estimated for September)

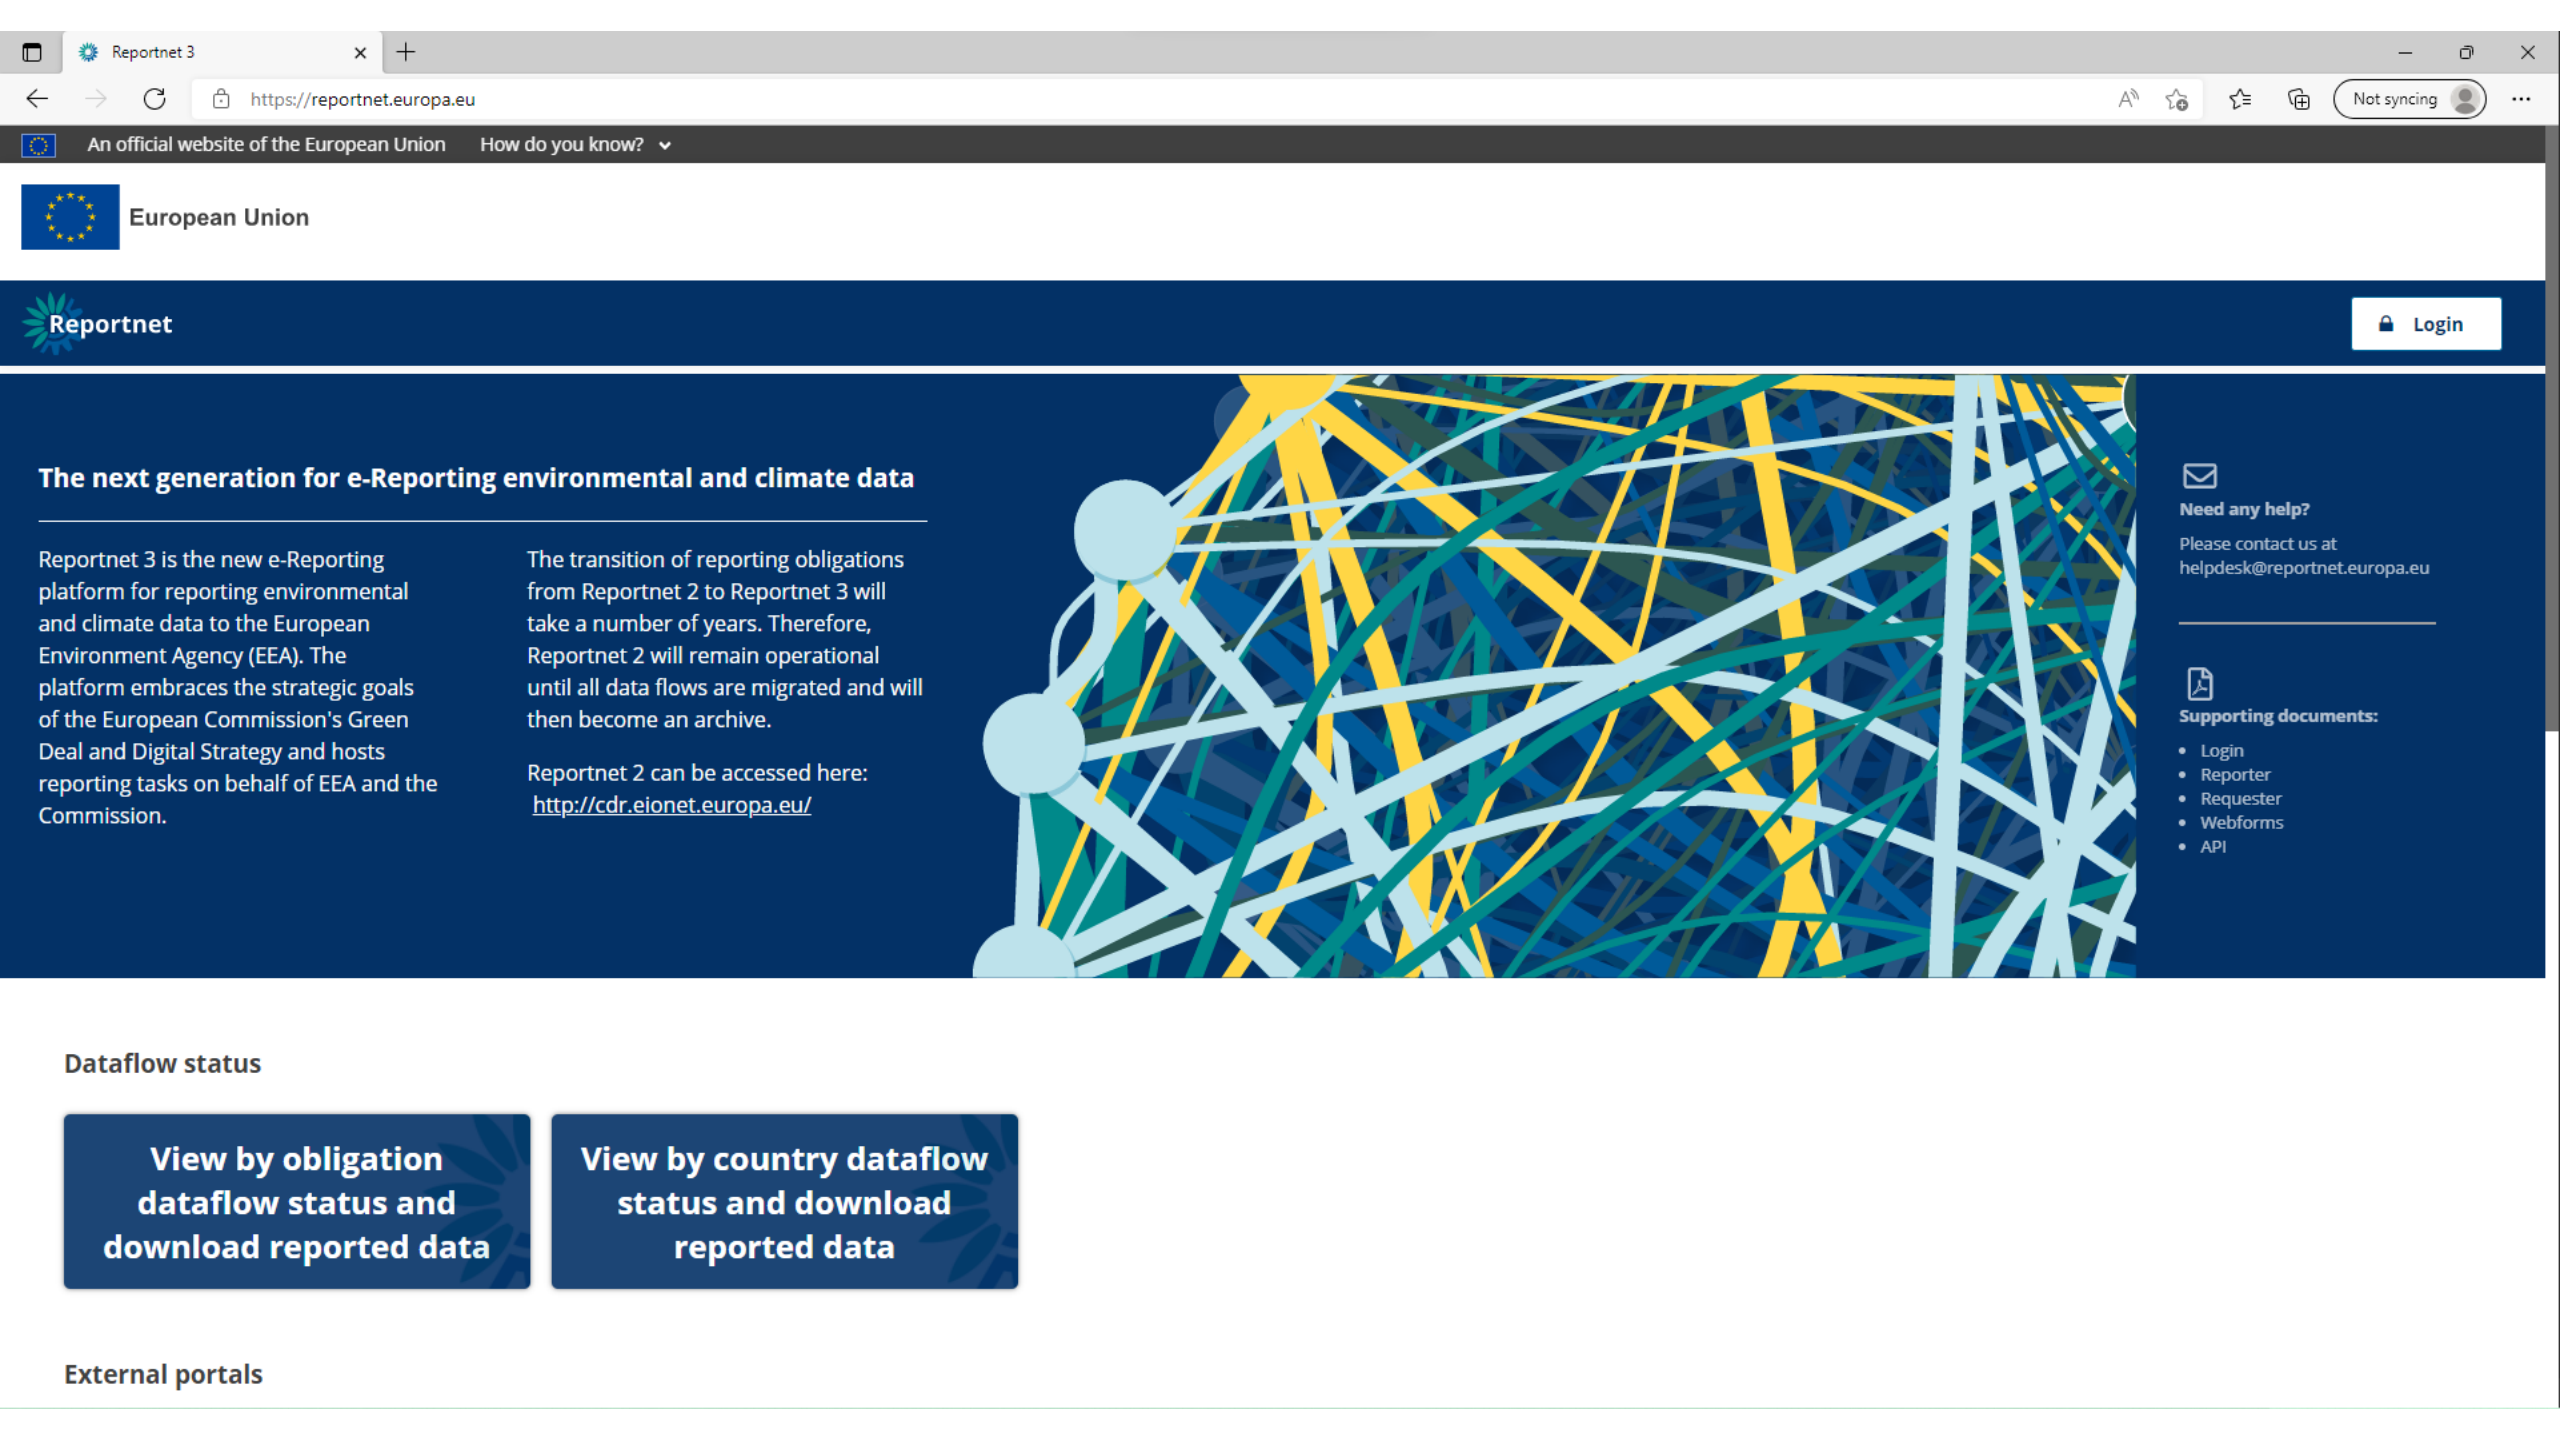

Art 17 schema is now embedded in the platform

Reference tables are nearly ready

Validation rules have been defined

Validation rules are at the final stage of being embedded in the platform

An internal testing phase and relevant updates will follow before opening for a testing of MS

Login

The next generation for e-Reporting environmental and climate data

Reportnet 3 is the new e-Reporting platform for reporting environmental and climate data to the European Environment Agency (EEA). The platform embraces the strategic goals of the European Commission's Green Deal and Digital Strategy and hosts reporting tasks on behalf of EEA and the Commission.

The transition of reporting obligations from Reportnet 2 to Reportnet 3 will take a number of years. Therefore, Reportnet 2 will remain operational until all data flows are migrated and will then become an archive.

Reportnet 2 can be accessed here: <http://cdr.eionet.europa.eu/>

Dataset 1 – Birds Checklist

1. The process steps are followed as detailed in the 'General report'. The difference being the data entry, schema and the quality control checks
2. Fill in the checklists as a first step because many validation rules from the other tables are linked to the species code - season combination of this checklist

The checklist can be updated while reporting

(though we recommend to do so only when absolutely necessary)

- Flag bird species – season combinations for deletion by selecting in the presence_code 'DEL'
- Add new bird species – season combination
- Change information in presence_code and SPA_trigger by directly selecting from the drop down

The field SPA_trigger refers to 'Non Annex I SPA trigger' species only

Information on reason behind any change is mandatory otherwise a delivery is blocked

Mandatory birds to be reported are those specified in the Explanatory Notes:

(PRE, EXBA, the four non-native species and the respective Annex – season combinations for each part of the Reporting Format)

All mandatory species should be reported apart from those flagged for deletion (DEL) in the country checklist

Reporting non mandatory features is left to MS. Any non mandatory feature submitted should comply with the validation rules and blockers.

Pay attention to Blockers for 'Birds' report

- Codelists, improper data type (e.g. numerical, date, etc.)
- First time reporting, population size unit if a population size value is reported, indication of 'sensitive species'
- Non-recommended population size units
- Fields that have the option to report 'unknown' or 'no data' (e.g trend)
- Field on 'methods'
- Population size if the method is other than 'Insufficient or no data available'
- Reason for change if the species has been reported in the previous report (first time reported is 'No')
- Main reason for change if there is a change (even if the reason for change is just one value)
- Are measures needed (YES/NO)
- Selection of primary measures if measures status is provided ('Part of measures identified have been taken' or 'Most/all of measures identified have been taken')
- Is a species nationally hunted (YES/NO)

Dataset 4 – Birds Spatial Information

The same process steps are followed as detailed in the 'General report'. The difference being the schema and the quality control checks
