

**USER MANUAL:**  
Delivery of national designation types information via the CDR webform  
for the Designation types registry

**Introduction**

This manual explains how to access and use the national designation types webform for reporting information to the European Environment Agency. The designation type information is used for validation of data reported for the Nationally designated areas (CDDA), the Natura 2000 network and the Emerald network.

**How to deliver**

All deliveries are provided via the Reportnet Central Data Repository (CDR). A summary of the delivery process is outlined below.

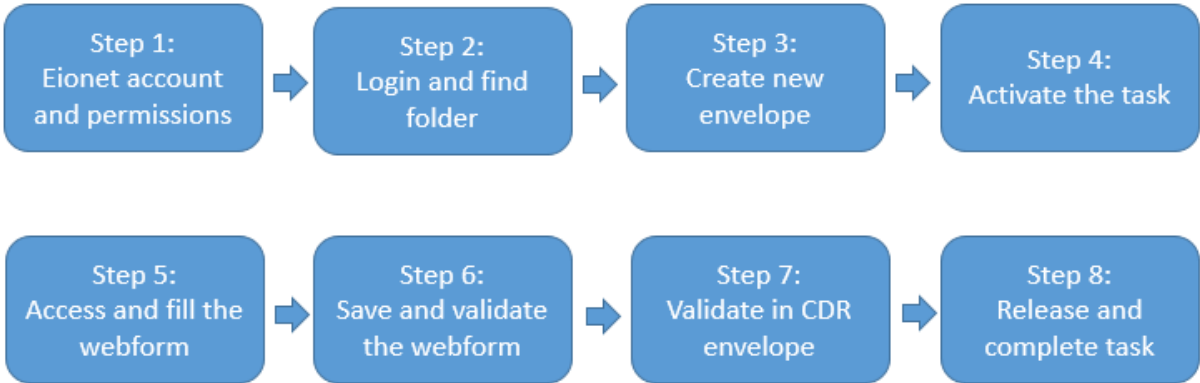

Figure 1 - Delivery process summary

## Designation types delivery process

### Step 1: Eionet account and access permissions

In order to access the webform, edit the national designation types of your country and submit the updated information, an Eionet account with appropriate reporting permissions is required. If you are either nominated CDDA reporter or Emerald reporter, you will have the necessary permissions. Please contact the Eionet Helpdesk ([helpdesk@eionet.europa.eu](mailto:helpdesk@eionet.europa.eu)) in case of questions.

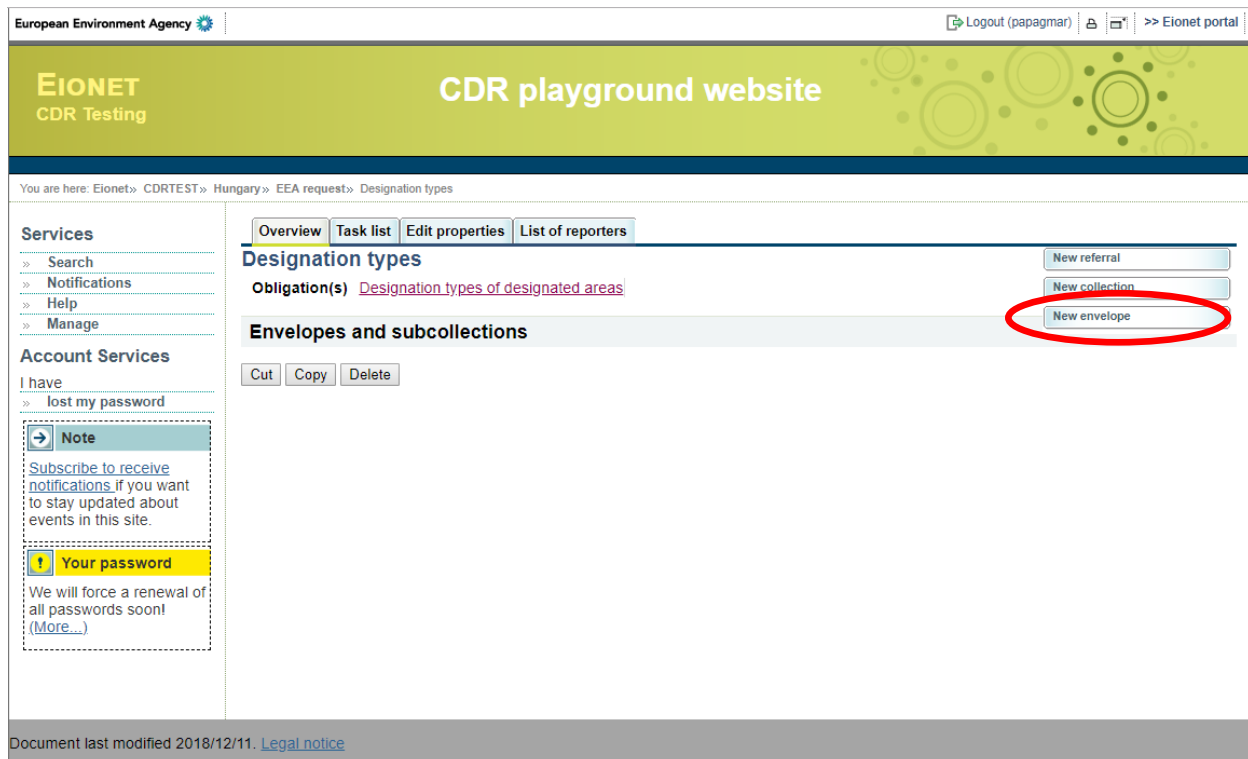

### Step 2: Login to the Central Data Repository and open your folder

1. You can access Reportnet's Central Data Repository (CDR) at <http://cdr.eionet.europa.eu>
2. Login at the upper right corner and navigate to the Designation types folder of you country. It is located in "EEA requests" > "Designation types registry". The url is

[http://cdr.eionet.europa.eu/\[two letter country code\]/eea/desig\\_type/](http://cdr.eionet.europa.eu/[two letter country code]/eea/desig_type/)

### Step 3: Create a new envelope

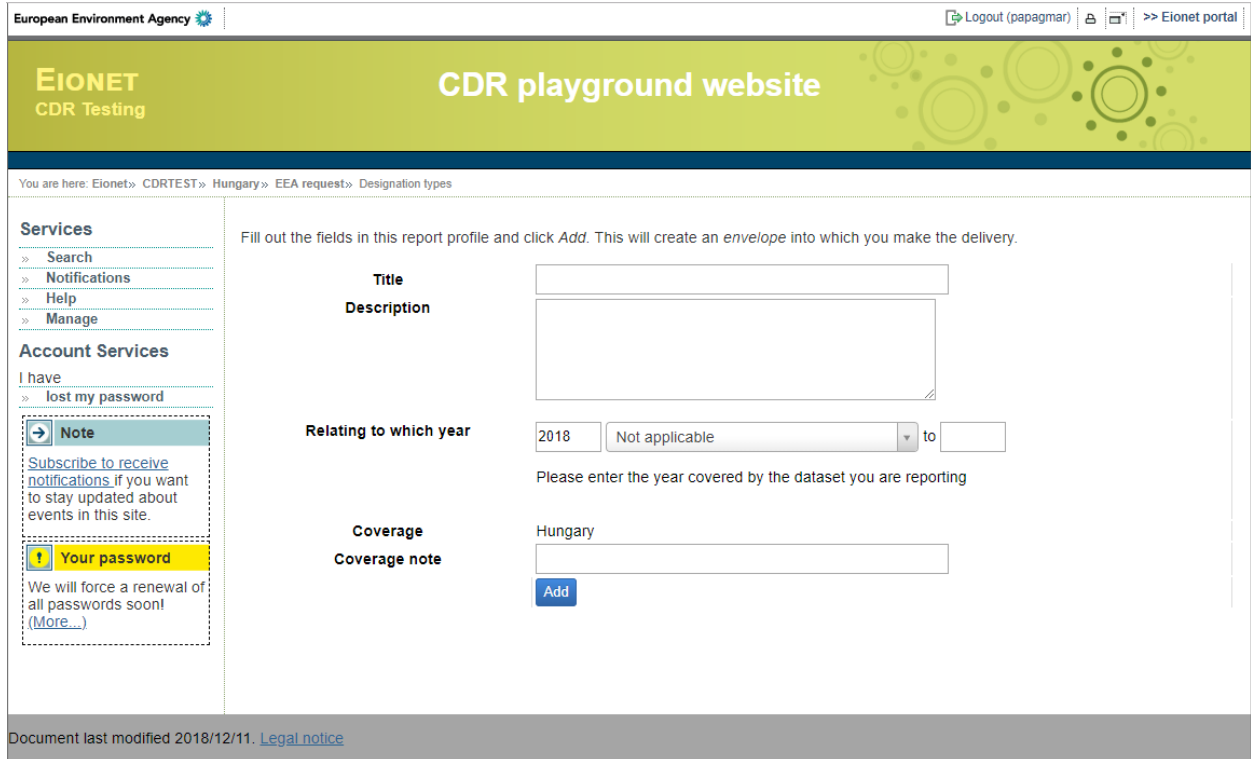

Now create a new envelope which will contain your data delivery by clicking on the button 'New envelope' at the upper right corner of the screen:

The screenshot shows the EIONET CDR playground website interface. At the top, there is a navigation bar with the EIONET logo and the text "CDR playground website". Below this, a breadcrumb trail indicates the current location: "You are here: Eionet» CDRTTEST» Hungary» EEA request» Designation types". The main content area is divided into several sections. On the left, there are "Services" (Search, Notifications, Help, Manage) and "Account Services" (lost my password, Note, Your password). The central part of the page displays "Designation types" with tabs for "Overview", "Task list", "Edit properties", and "List of reporters". Below this, there is a section for "Envelopes and subcollections" with buttons for "Cut", "Copy", and "Delete". On the right side of the "Designation types" section, there are three buttons: "New referral", "New collection", and "New envelope". The "New envelope" button is circled in red, indicating the target for Step 3.

Figure 2 – Step 3: Create envelope button

The “Add envelope” page is displayed, to complete the envelope’s metadata.

Fill out the fields in this report profile and click *Add*. This will create an *envelope* into which you make the delivery.

**Title**

**Description**

**Relating to which year** 2018  to

Please enter the year covered by the dataset you are reporting

**Coverage** Hungary

**Coverage note**

Document last modified 2018/12/11. [Legal notice](#)

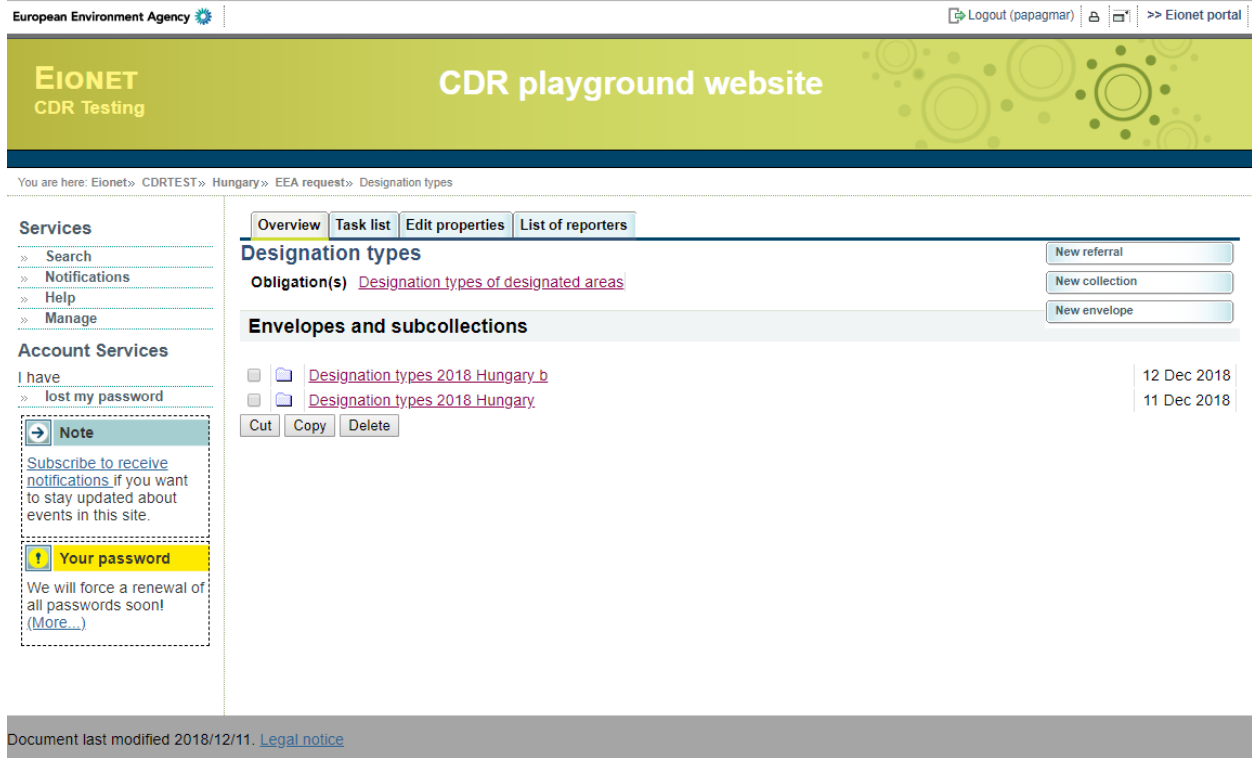

Figure 3 – Step 3: Create envelope page

In the “Add envelope” page the following fields are displayed:

- **Title:** the title of the envelope should serve as a brief summary of the delivery. Example “Designation types 2019”.
- **Description:** optional description of the delivery.
- **Relating to which year:** indicates the period that the data will refer to.
- **Coverage:** The country to which the reporting refers.
- **Coverage note:** Notes if any from the reporting country.

The fields “Title” and “Relating to which year” are mandatory.

After completing the fields of the envelope, click the “Add” button to create the envelope. You are redirected to the “Envelopes and subcollections” page of the Designation types reporting folder. In the example below, the envelope “Designation types 2018 Hungary b” was created.

The screenshot shows the EIONET CDR playground website interface. At the top, there is a header with the EIONET logo and the text "CDR playground website". Below the header, a navigation bar contains tabs for "Overview", "Task list", "Edit properties", and "List of reporters". The main content area is titled "Designation types" and includes a sub-section "Envelopes and subcollections". This section displays a list of items:

Item Name	Date
<a href="#">Designation types 2018 Hungary b</a>	12 Dec 2018
<a href="#">Designation types 2018 Hungary</a>	11 Dec 2018

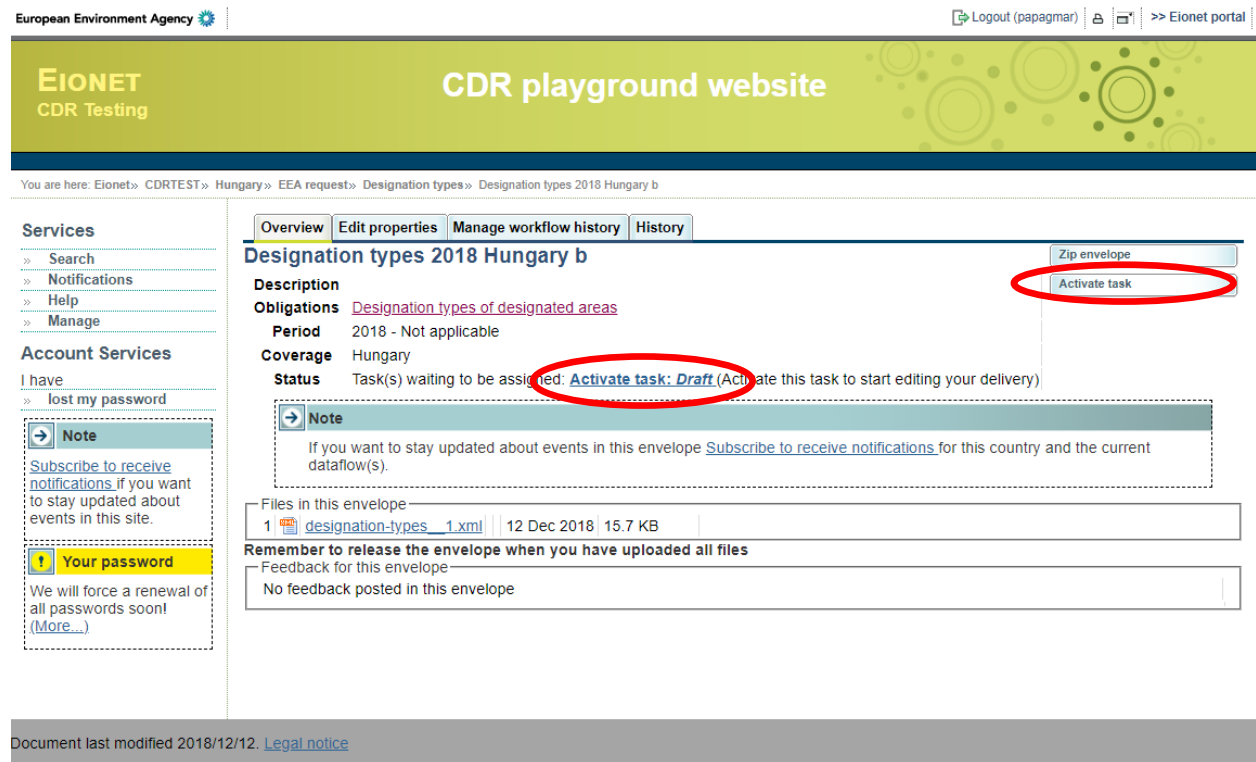

Below the list, there are buttons for "Cut", "Copy", and "Delete". To the right of the list, there are buttons for "New referral", "New collection", and "New envelope". The left sidebar contains sections for "Services" (Search, Notifications, Help, Manage) and "Account Services" (I have lost my password, Note, Your password).

Figure 4 – Step 3: Designation types envelope

### Step 4: Activate the task

Open the new envelope and activate the draft task. Activating means that you have reserved the envelope for you to work on. Other users will not be able to modify it until the envelope is deactivated or released by you. Your new envelope is now in “Draft status” and files can be added.

To activate the task either click the “Activate task” button at the upper right corner of the screen or the “Activate task: Draft” link provided in the Status section of the envelope.

The screenshot shows the EIONET CDR playground website interface. At the top, there is a navigation bar with the EIONET logo and the text "CDR playground website". Below this, a breadcrumb trail indicates the current page: "You are here: Eionet» CDRTEST» Hungary» EEA request» Designation types» Designation types 2018 Hungary b".

The main content area is titled "Designation types 2018 Hungary b" and includes several tabs: "Overview", "Edit properties", "Manage workflow history", and "History". The "Overview" tab is active. The page displays the following information:

- Description:** Designation types of designated areas
- Obligations:** Designation types of designated areas
- Period:** 2018 - Not applicable
- Coverage:** Hungary
- Status:** Task(s) waiting to be assigned: **Activate task: Draft** (Activate this task to start editing your delivery)

On the right side of the page, there are two buttons: "Zip envelope" and "Activate task". The "Activate task" button is circled in red. In the status section, the link "Activate task: Draft" is also circled in red.

On the left side, there is a sidebar with "Services" and "Account Services" sections. The "Account Services" section includes a "Note" box with a link to "Subscribe to receive notifications" and a "Your password" warning box.

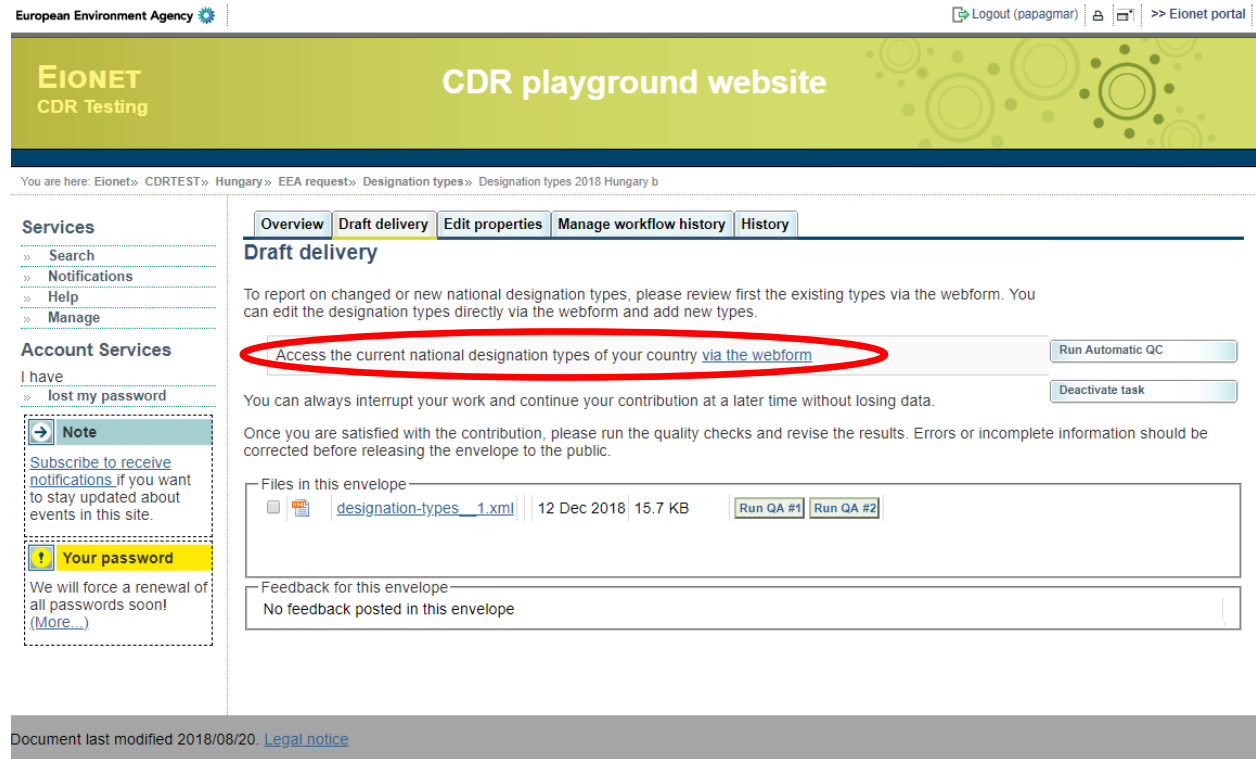

At the bottom of the page, there is a footer that reads: "Document last modified 2018/12/12. [Legal notice](#)".

Figure 5 – Step 4: Activate task

### Step 5: Access the online webform

An xml file is already stored in the envelope, prefilled with the most recent information on national designation types from your country.

The next step is to access the online webform by clicking the link “via the webform” marked in red in the following screenshot:

The screenshot shows the EIONET CDR playground website interface. At the top, there is a navigation bar with the EIONET logo and the text "CDR playground website". Below this, a breadcrumb trail indicates the current location: "You are here: Eionet > CDRTEST > Hungary > EEA request > Designation types > Designation types 2018 Hungary b".

The main content area is titled "Draft delivery" and includes several tabs: "Overview", "Draft delivery", "Edit properties", "Manage workflow history", and "History". The "Draft delivery" tab is active. The text below the tabs reads: "To report on changed or new national designation types, please review first the existing types via the webform. You can edit the designation types directly via the webform and add new types." A red circle highlights the link "via the webform" in the sentence: "Access the current national designation types of your country [via the webform](#)".

Below this text, there are two buttons: "Run Automatic QC" and "Deactivate task". A message states: "You can always interrupt your work and continue your contribution at a later time without losing data." Another message says: "Once you are satisfied with the contribution, please run the quality checks and revise the results. Errors or incomplete information should be corrected before releasing the envelope to the public."

The "Files in this envelope" section shows a table with one file: "designation-types\_1.xml", dated "12 Dec 2018", with a size of "15.7 KB". There are two buttons next to the file: "Run QA #1" and "Run QA #2".

The "Feedback for this envelope" section shows "No feedback posted in this envelope".

On the left side, there is a sidebar with "Services" (Search, Notifications, Help, Manage), "Account Services" (I have, lost my password), and a "Note" section with a link to "Subscribe to receive notifications" and a "Your password" warning.

At the bottom, a footer indicates "Document last modified 2018/08/20. [Legal notice](#)".

Figure 6 – Step 5: Access the designation types webform

An example of this webform is displayed below:

Figure 7 – Step 5: Example of the designation types webform

The webform is prefilled with the most recent information reported by your country to the EEA.

You can modify an existing designation type, terminate it or create new types. You can also copy existing designation types and subsequently edit them.

### Sub-step 5.1: Add designation types

When selecting to click the “Add designation type” button, the following webform page is displayed.

Designation Types for protected areas 2018

[Back to list](#)

**Designation type**

Region code

Designation type code  Designation type code is required Designation type code must follow the format CountryCode / RegionCode + 2 digit number

Designation type category  Designation type category is required

Figure 8 – Step 5.1: Add a designation type

As it can be observed from the messages displayed, some fields are mandatory. You will be able to save the webform with incomplete designation types. You can interrupt the work and return at another time. The CDR validation will however not allow that you release the CDR envelope with incomplete designation types inside.

An overview of the data element is in the table 1 below. For full specifications, see the Data Dictionary

<http://dd.eionet.europa.eu/datasets/latest/DesignationTypes>

Designation type field	Field type	Mandatory (M) / Optional (O)	Possible values	Restrictions
Region code	Drop-down	M	See <a href="#">here</a> .	More than one region code will be available for the following countries: <ul style="list-style-type: none"> <li>• DK</li> <li>• NO</li> <li>• UK</li> <li>• NL</li> <li>• ES</li> <li>• FR</li> </ul>
Designation type code	Text field	M		The designation type code is the unique identifier. The designation type code must consist of exactly four (4) characters and follow the format CountryCode / RegionCode + two (2) digit number.
Designation type category	Drop-down	M	A, B, C, NA	The 'NA' (Not applicable) value is allowed only for designation types with code ending with '00' (No protection status) or '99' (Others).
Designation type name	Text field	M		The value should consist of at least 1 and up to 255 characters.
Designation type name in English	Text field	M		The value should consist of at least 1 and up to 255 characters.
Creating sites	Drop-down	M	false, true	
Designation period begin (YYYY)	Text field	M		The value must consist of 4 digits and must be greater than or equal to 1800.
Designation period end (YYYY)	Text field	O		If the designation type should be terminated. The value must consist of 4 digits and must be greater than or equal to 2010.
Legal reference name	Text field	O		The value should consist of up to 1000 characters.
Legal reference publication date (YYYY-MM-DD)	Date field	O	The format of the date is the following: YYYY-MM-DD	The value should consist of at least 10 and up to 255 characters.
Legal reference link	Text field	O		The value should consist of up to 1000 characters.
Legal reference level	Drop-down	O	international, national, subnational	
Legal reference official journal identification	Text fie	O		The value should consist of up to 1000 characters.
Competent authority organisation name	Text field	O		The value should consist of up to 1000 characters.
Competent authority website	Text field	O		The value should consist of up to 1000 characters.
Remark	Text field	O		The value should consist of up to 1000 characters.
Remark Source	Text field	O		The value should consist of up to 1000 characters.

Table 1 – Data elements overview

### Sub-step 5.2: “Edit” designation types

When selecting to click the “Edit” button next to a designation type in the webform list (see Figure 7), the following page is displayed:

Designation Types for protected areas 2018

Select Language  
English

[Back to list](#)

**Designation type**

Region code: HU

Designation type code: HU11

Designation type category: C

Designation type name: Natúrpark

Designation type name in English: Naturpark

Creating sites: true

Designation period begin (YYYY): 2018

Designation period end (YYYY):

**Legal Reference**

Legal reference name: Act No. LIII. Of 1996 on Nature Conservation 45, 295

Legal reference publication date (YYYY-MM-DD):

Legal reference link:

Legal reference level: Select option

Legal reference official journal identification: MK 1996/53

Competent authority organisation name: Ministry for Environment and Water

Competent authority website:

Remark: The category "A" was changed to "C" because „Naturpark" in Hungary is not a traditionally used category for protecting flora fauna and habitats. It is more a municipal-residential-NGO initiative for nature conservation, ecoturistic, environmental education, extensive farming purposes. The area has slight

Remark Source: Nature Conservation Act (1996. évi LIII. törvény) 4, 5 q)

Figure 9 – Step 5.2: Edit a designation type

In general, the same rules apply per field as when selecting to add a designation type.

**Note:** An existing designation type code cannot be changed. It is the unique identifier of the dataset record. It means that you will not be able to edit its code or delete it once it was included in the registry. If you need to change a designation type code of a previously released designation type, you may copy and create a new designation type based on the original. You should then terminated the original by adding a date to the designationPeriodEnd field.

#### Sub-step 5.3: “Copy” designation type

Copy an existing designation type from the list by clicking the “Copy” button. In this case a new item is created in the list with the same metadata as the initial designation type. Since the copied item will preserve the code field of the initial item, be sure to edit the copied item in order to change the code so it becomes unique.

#### “Back to list” button

When adding a designation type or when updating an already existing designation type, click the “Back to list” button to return to the designation types list page. The new or updated designation type with its metadata is stored when saving and closing the form.

**Note:** It is important to mention, that the webform does **NOT** save changes automatically. In case you leave the form without saving, changes will be lost.

#### Sub-step 5.4: “Delete” designation types

If a not yet released designation type is obsolete, it can be deleted by using the “Delete” button in the webform. Designation types that were already released and included to the registry cannot be deleted, only terminated by adding a date to the designationPeriodEnd field.

### Step 6: Save data, print preview and form validations

The webform provides some action buttons in order to save the data, validate them, see a print preview or close the form. The functionality related to the action buttons is outlined below.

- **Save form**

In order to save any changes and additions in the designation types, click the “Save form” button.

In case the form contains errors, a message is displayed informing you about the errors and requesting for your confirmation in order to proceed with saving the form.

Figure 20 – Step 6: Validation errors message

Click “OK” button to save the form even though it contains errors or “Cancel” button to return to the previous state.

When selecting the “OK” button (in spite of errors) or when selecting the “Save form” button in case no errors are contained, a message for successfully saving the form is displayed.

Figure 31 – Step 6: Successful saving

The data is saved both in the webform and in the xml file (named designation-types\_\_1.xml) in the CDR envelope. Click the “OK” button to close the message.

- **Close form**

When selecting the “Close Form” button, a message to confirm leaving the form and discard any unsaved changes is displayed.

Figure 4 – Step 6: Leave webform without having saved the data

Click the “Leave” button to close the form and discard unsaved changes or the “Cancel” button to remain in the form.

When closing the form, you are redirected to the Draft delivery tab of the envelope details page.

- **Print Preview**

When clicking the “Print Preview” button, an html representation of the designation types is displayed in a new browser tab including the details of all the designation types.

Designation types																			
Country code	Region code	Designation type code	Designation type category	Designation type name	Designation type name in English	Creating sites	Legal reference					Competent authority		Remark	Remark source	Designation period			
							name	publication date	link	level	official journal identification	organisation name	website			begin	end		
HU	HU	HU11	C	Naturpark	Naturpark	true	Act No. LIII. Of 1996 on Nature Conservation 4§, 29§					MK 1996/53	Ministry for Environment and Water		The category "A" was changed to "C" because „Naturpark” in Hungary is not a traditionally used category for protecting flora fauna and habitats. It is more a municipal-residential-NGO initiative for nature conservation, ecotouristic, environmental education, extensive farming purposes. The area has slight legislative background because the minister gives contribution declaration for using the name of Naturpark. The area of the Naturparks is fairly large because mostly the whole area of the contributing municipalities is counted into the area.	Nature Conservation Act (1996. évi LIII. törvény) 4. § q)	2018

Figure 53 – Example of print preview

- **Validate**

When selecting the “Validate” button, internal validations are executed in the form checking the validity of each designation type. The status of each one might be either “Validated” if the designation type passes all rules or “Incomplete” if it does not pass any of the rules.

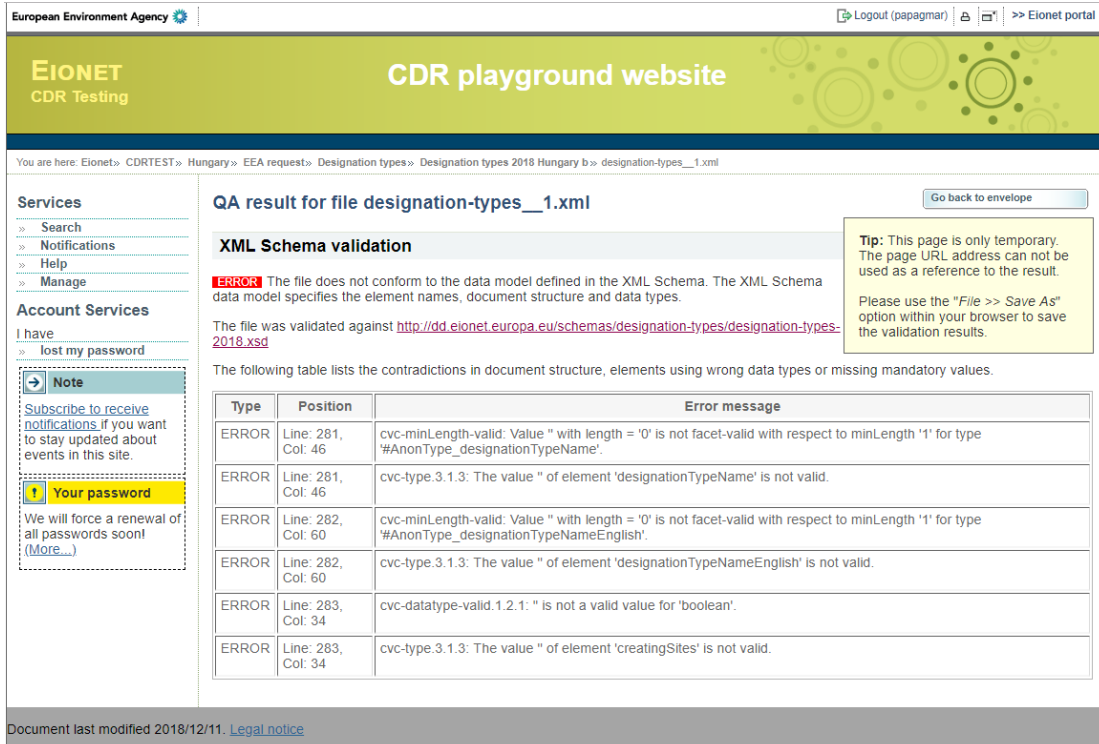

Figure 64 – Step 6: Validation process results

Incomplete designation types must be edited in order to pass the final CDR validation.

## Step 7: CDR QA validations

In the Draft delivery tab of the envelope, next to the Designation types .xml file, two buttons are available through which the QA scripts can be executed in order to check the file's validity.

Click the "Run QA #1" button to run the XML Schema validations and the "Run QA #2" button to run the QA checks. The following results pages are displayed:

The screenshot shows the EIONET CDR Testing playground website. The main content area displays the results of an XML Schema validation for the file 'designation-types\_\_1.xml'. The results indicate an error: 'The file does not conform to the data model defined in the XML Schema. The XML Schema data model specifies the element names, document structure and data types.' Below this, a table lists the specific contradictions in the document structure.

**QA result for file designation-types\_\_1.xml**

**XML Schema validation**

**ERROR:** The file does not conform to the data model defined in the XML Schema. The XML Schema data model specifies the element names, document structure and data types.

The file was validated against <http://dd.eionet.europa.eu/schemas/designation-types/designation-types-2018.xsd>

The following table lists the contradictions in document structure, elements using wrong data types or missing mandatory values.

Type	Position	Error message
ERROR	Line: 281, Col: 46	cvc-minLength-valid: Value " with length = '0' is not facet-valid with respect to minLength '1' for type '#AnonType_designationTypeName'.
ERROR	Line: 281, Col: 46	cvc-type.3.1.3: The value " of element 'designationTypeName' is not valid.
ERROR	Line: 282, Col: 60	cvc-minLength-valid: Value " with length = '0' is not facet-valid with respect to minLength '1' for type '#AnonType_designationTypeNameEnglish'.
ERROR	Line: 282, Col: 60	cvc-type.3.1.3: The value " of element 'designationTypeNameEnglish' is not valid.
ERROR	Line: 283, Col: 34	cvc-datatype-valid.1.2.1: " is not a valid value for 'boolean'.
ERROR	Line: 283, Col: 34	cvc-type.3.1.3: The value " of element 'creatingSites' is not valid.

**Tip:** This page is only temporary. The page URL address can not be used as a reference to the result. Please use the "File >> Save As" option within your browser to save the validation results.

### QA result for file designation-types\_\_1.xml [Go back to envelope](#)

Checked XML file: [https://cdrtest.eionet.europa.eu/hu/coltqesoq/colxa9xxg/envxat6a/designation-types\\_\\_1.xml](https://cdrtest.eionet.europa.eu/hu/coltqesoq/colxa9xxg/envxat6a/designation-types__1.xml)

This XML file did NOT pass the following BLOCKER check(s): R2\_0,R3\_0

**Tip:** This page is only temporary. The page URL address can not be used as a reference to the result.

Please use the "File >> Save As" option within your browser to save the validation results.

### How to read the test results

All test results are labeled with coloured bullets. The number in the bullet refers to the rule code. The background colour of the bullets means:

**QC TESTS**

- Red - the check issued a blocking error. Please correct the invalid records.
- Red - the check issued an error. Please correct the invalid records.
- Orange - the check issued a warning. Please review the corresponding records.
- Blue - the check issued info. Please review the corresponding records.
- Green - the check passed without errors or warnings.

Click on the "Show records" link to see more details about the test result.

<b>R1_0</b>	<b>Mandatory values</b>	Passed	
<b>R2_0</b>	<b>Code list check</b>	Wrong code list	<a href="#">Show records</a>
<b>R3_0</b>	<b>Data types</b>	Provided values do not follow the data definitions.	<a href="#">Show records</a>
<b>R4_0</b>	<b>Duplicate code checks</b>	Passed

Figure 16 – Step 7: QA #2 results page with errors

Based on the feedback received, you can correct the errors of your files and re-execute the QA validations to confirm that the problems (if any) have been fixed.

When all issues are corrected and the QA validations are re-run, the results pages are the following ones:

Figure 17 – Step 7: QA #1 results page - success

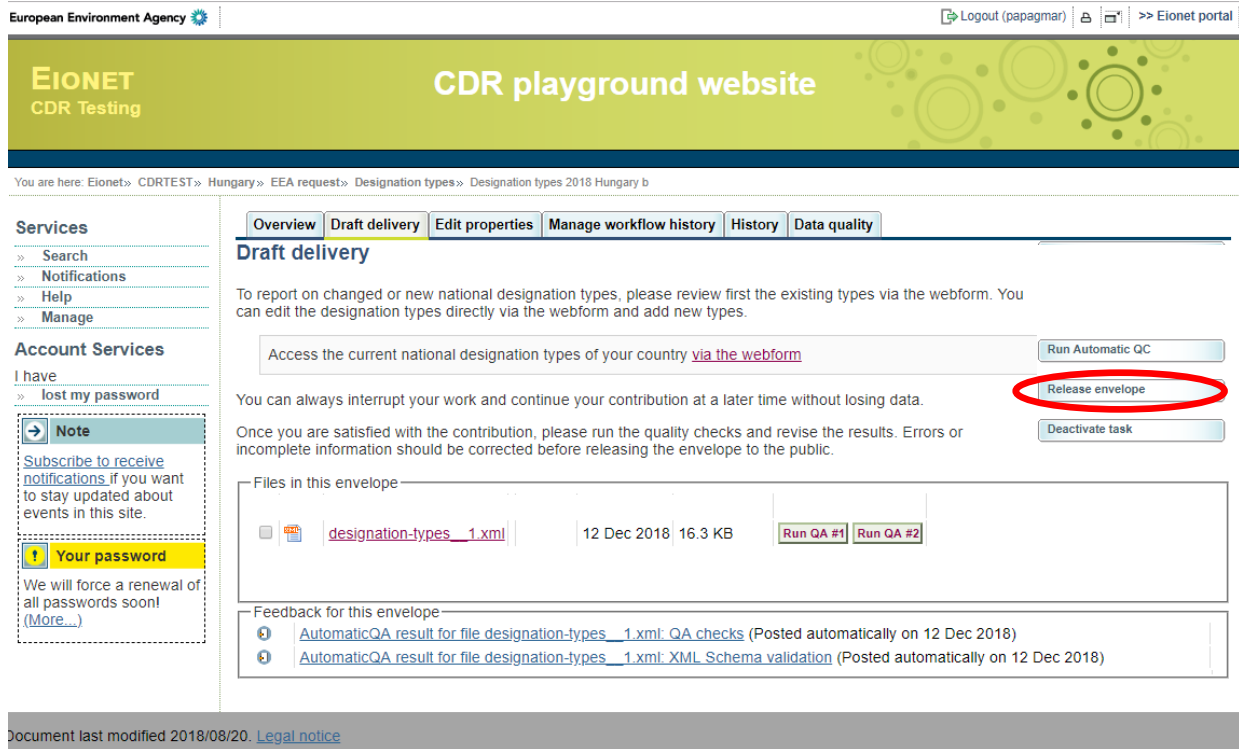

QC TESTS	Description	Status
Red	- the check issued a blocking error. Please correct the invalid records.	
Red	- the check issued an error. Please correct the invalid records.	
Orange	- the check issued a warning. Please review the corresponding records.	
Blue	- the check issued info. Please review the corresponding records.	
Green	- the check passed without errors or warnings.	

R1_0	Mandatory values	Passed
R2_0	Codelist check	Passed
R3_0	Data types	Passed
R4_0	Duplicate code checks	Passed

Figure 18 – Step 7: QA #2 results page – success

## Step 8: Release and complete task

In order to complete the task, click on the right side button “Release envelope”.

The screenshot shows the EIONET CDR playground website interface. At the top, there is a navigation bar with the EIONET logo and the text 'CDR playground website'. Below this, a breadcrumb trail indicates the current location: 'You are here: Eionet» CDRTST» Hungary» EEA request» Designation types» Designation types 2018 Hungary b'. The main content area is titled 'Draft delivery' and includes several tabs: 'Overview', 'Draft delivery', 'Edit properties', 'Manage workflow history', 'History', and 'Data quality'. The 'Draft delivery' tab is active. The page contains instructions for reporting on national designation types and provides buttons for 'Run Automatic QC', 'Release envelope' (circled in red), and 'Deactivate task'. A table lists files in the envelope, including 'designation-types\_1.xml' with a 'Run QA #1' and 'Run QA #2' button. A feedback section shows automatic QA results for the file.

Figure 19 – Step 7: Release envelope

When the “Release envelope” button is pressed, the CDR QA tests are executed again, this time automatically for the final envelope release.

Figure 71 – Step 8: Complete envelope

Now the report is submitted to the EEA and the envelope is available to the public. Please note that the confirmation of receipt message and automatic feedback is stored automatically and is displayed at the bottom of the page, in the section “Feedback for this envelope”. Please subscribe to notifications and the left hand side, to be notified of events in the envelope. Additional feedback might be provided by EEA or ETC/BD.

Be aware that due to the processing, it may take a couple of days before new information is reflected in the Designation types registry.

## Getting help

The reporting manual and other information related to nationally designation types reporting is available at: [http://cdr.eionet.europa.eu/help/designation\\_types](http://cdr.eionet.europa.eu/help/designation_types)
